Workshop
für Studierende und Lehrende der Fremdsprachendidaktiken und Lehramtsstudiengänge
Leitung: Tim Morgan / Queen Mary University of London

Session #1*:

Inspiring e-Teaching
Creating e-teaching resources in around 5 minutes

Monday 26th May 10:15 - 12:45 DOR 24, 1.502

This session is particularly relevant for staff and students involved in training to become teachers. In this practical hands-on workshop, we will look at a variety of free web tools that enable non-technical teachers/students to create bespoke e-learning resources in minutes, not hours. Please bring your mobile phone / tablet / laptop with you for the session.

Session #2*:

Students as Producers
How students can contribute to their own learning

Tuesday 27th May 10:15 – 12:45 Grimm-Zentrum 1.310

In the UK there is a lot of interest in how students can play a more active role in their own learning and how to make areas of the curriculum that students have historically found diffi-cult more accessible. The 'Students as Producers' project supports students in creating teaching resources that help demystify these areas. Students - with their prolific use of Web 2.0 technologies plus their unique insight as learners - have a lot to offer. Tim Morgan, the project coordinator will show various case studies and talk about what Queen Mary University of London have learned so far. Please bring your mobile phone / tablet / laptop with you for the session.

* Die Workshop-Sessions können unabhängig voneinander besucht werden.
Um **Anmeldung** wird bis zum **23.05.14** via Email an engldida@hu-berlin.de gebeten.

Tim Morgan - Queen Mary University of London

Tim Morgan currently works at Queen Mary University of London and co-ordinates the "Students as Producers" project. He works with students and academics to look at areas of the curriculum that students have historically found difficult and to see how students can contribute to 'demystifying' these areas. The result of this is learning resources that are by students for students. http://www.learningdevelopment.qmul.ac.uk/resources/bystudents.

Tim originally studied Fine Art at Coventry University before spending 12 months in Jinan, China studying Chinese painting. On his return to the UK he completed a Masters in Interactive Design. He then spent ten years working as an interactive designer in the UK and Germany. After that he worked as an e-Learning Developer in Further Education, working very closely with teaching staff to create bespoke electronic learning resources. He later created a number of e-learning templates that allowed staff to quickly create their own resources. Link: http://vle.barkingcollege.ac.uk/cw/etemplates/index.html. In addition to this he began to deliver staff development workshops that promised to enable non-technical teachers to create electronic learning resources in around only 5 minutes. http://youtu.be/hcSKwK9j7_8
