

"Humankind first, my country second!"

**Does Identification With All Humanity explain attitudes on
global health resource allocation principles during COVID-19?**

Evidence from England and Germany

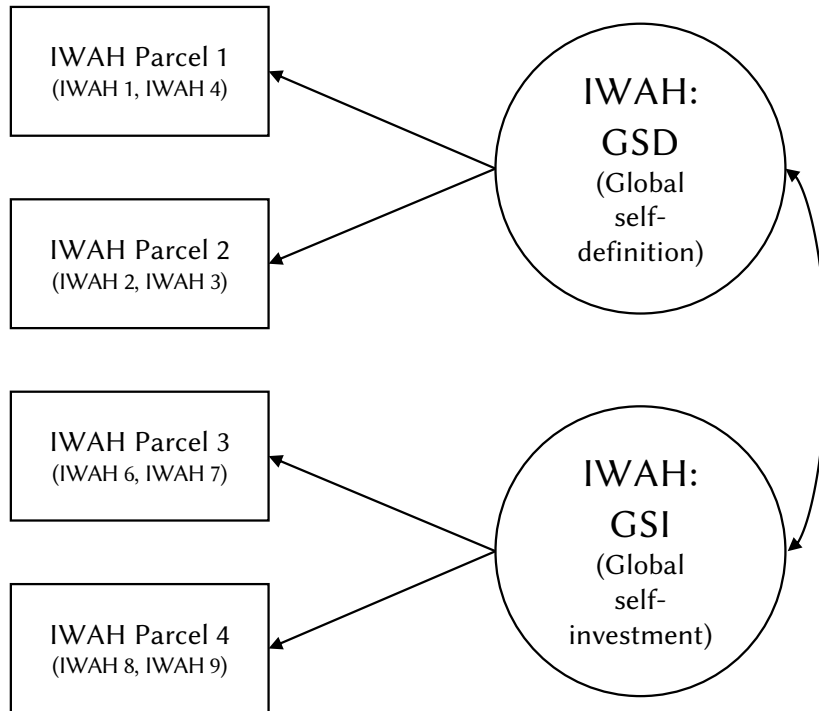

Friedemann Trutzenberg¹, Minne Luise Hagel² & Michael Eid¹

¹Department of Education and Psychology, Freie Universität Berlin, Berlin, Germany

²Department of Psychology, Faculty of Life Sciences, Humboldt University of Berlin, Berlin, Germany

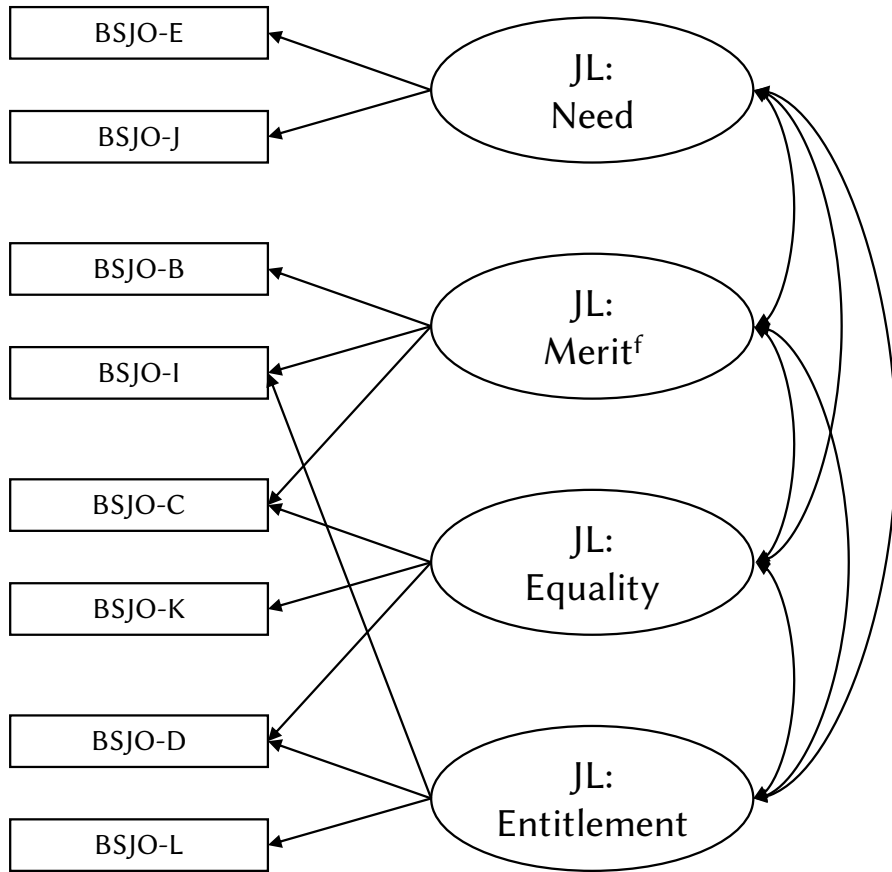

Measurement models

Global identification: Identification With All Humanity Scale – “People all over the world” (C-IWAH)

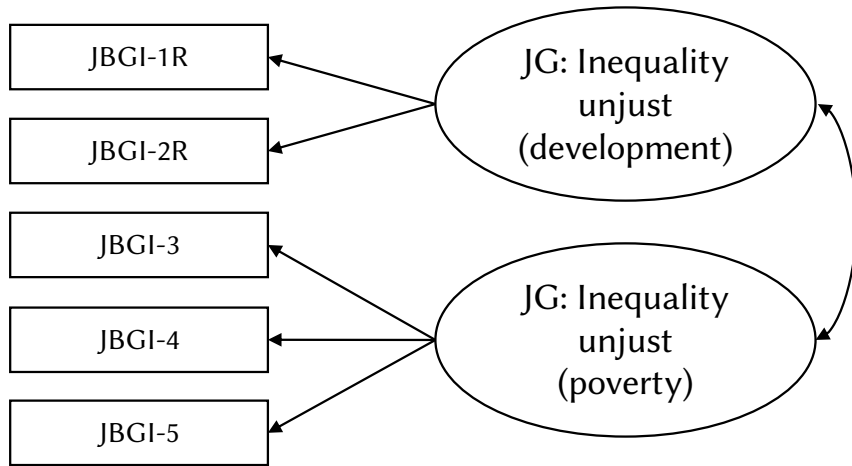

Unused items: IWAH 5

Justice beliefs (“normal” times, local): Basic Social Justice Orientation Scale (J-BSJO)

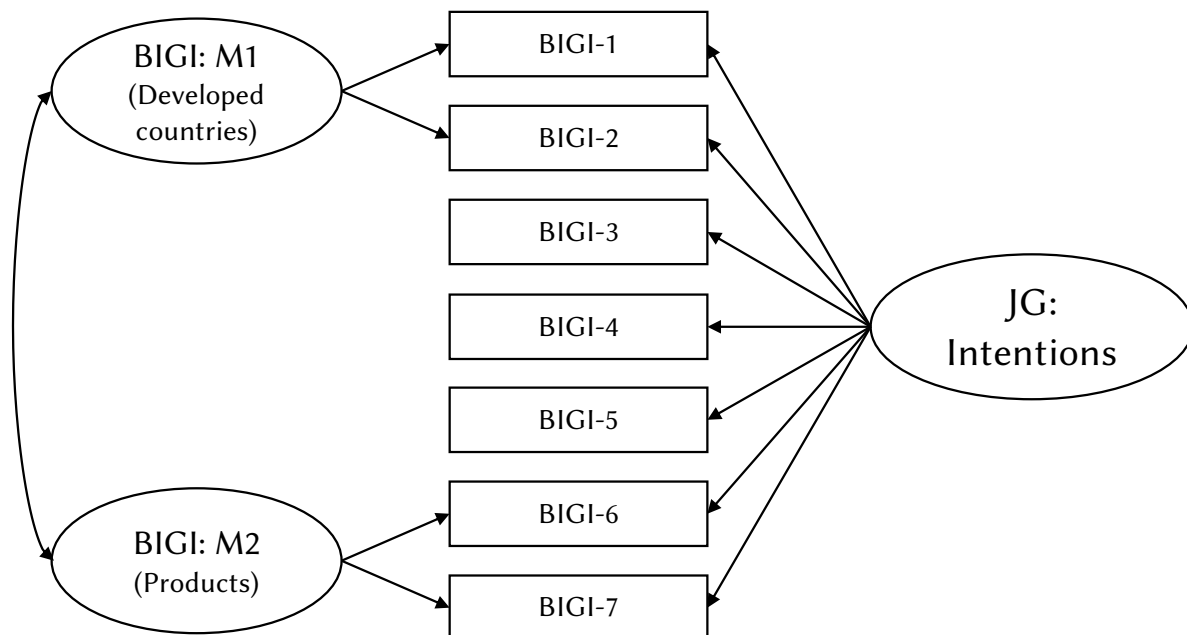

^foriginally labelled “equity” (Hülle et al., 2018, p. 668)

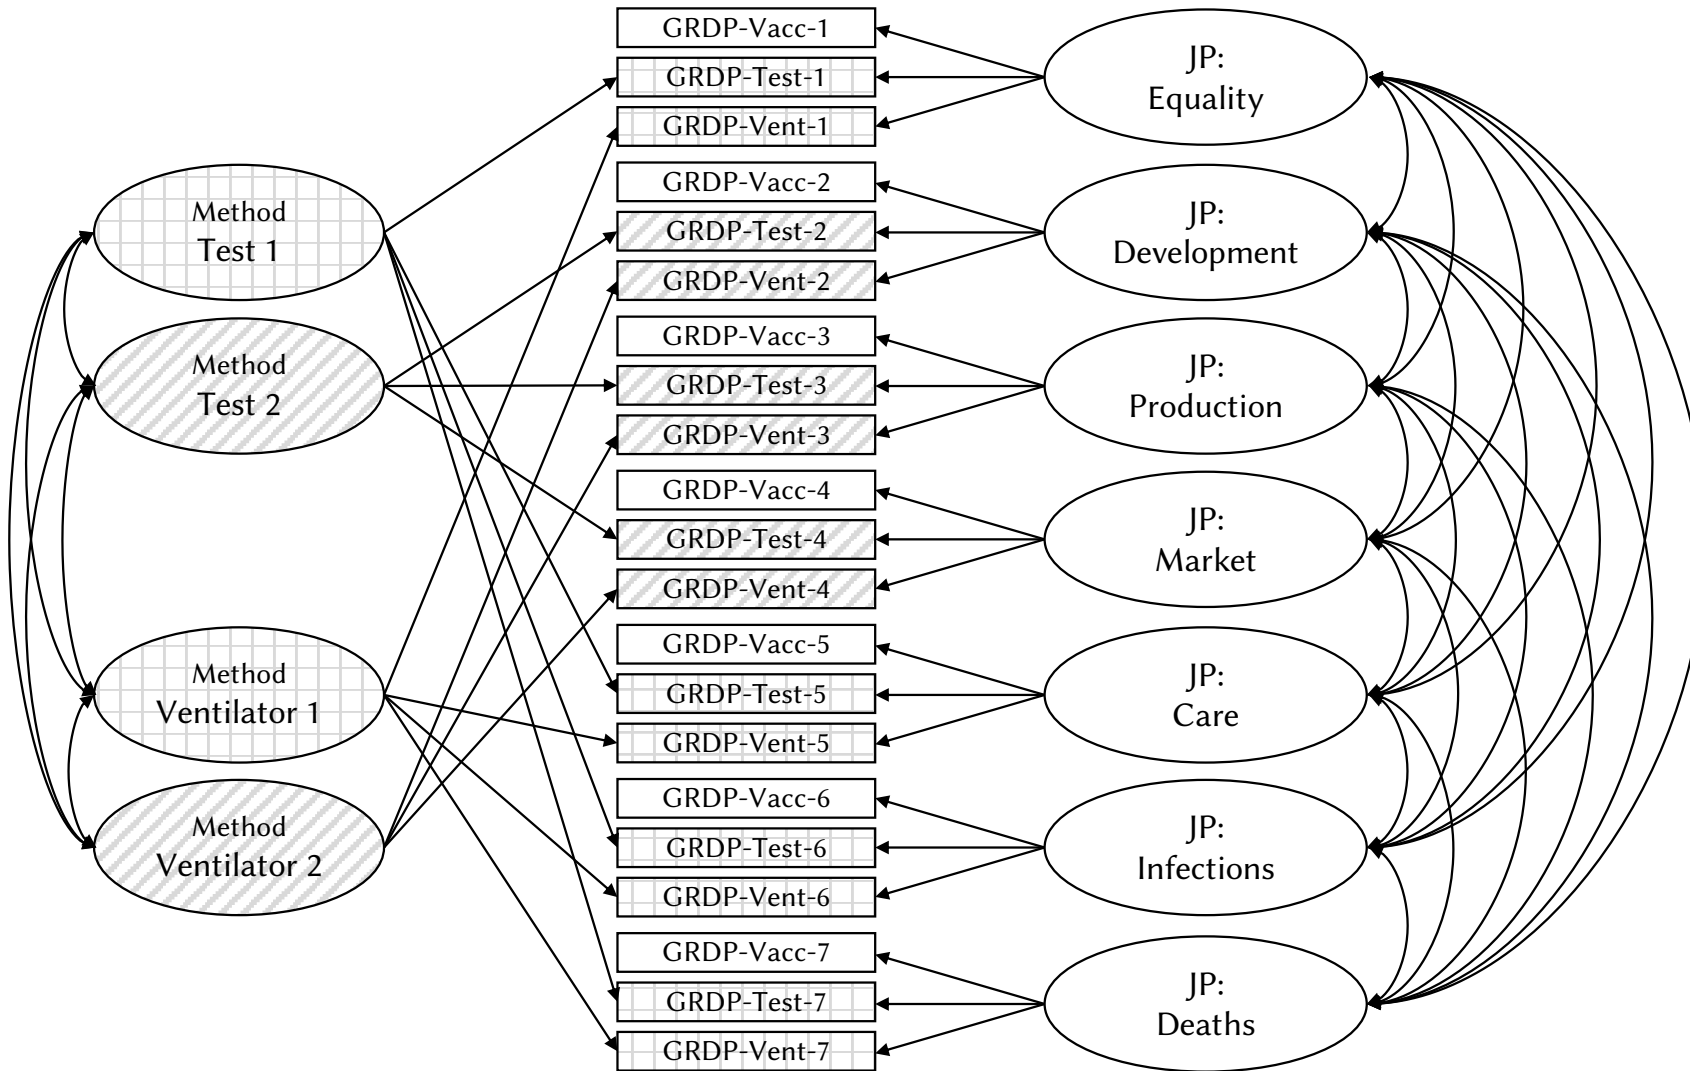

Justice beliefs (“normal” times, global): Measure of justice beliefs about global inequality (J-JBGI)

Justice beliefs (“normal” times, global): Measure of behavioural intentions toward global inequality (J-BIGI)

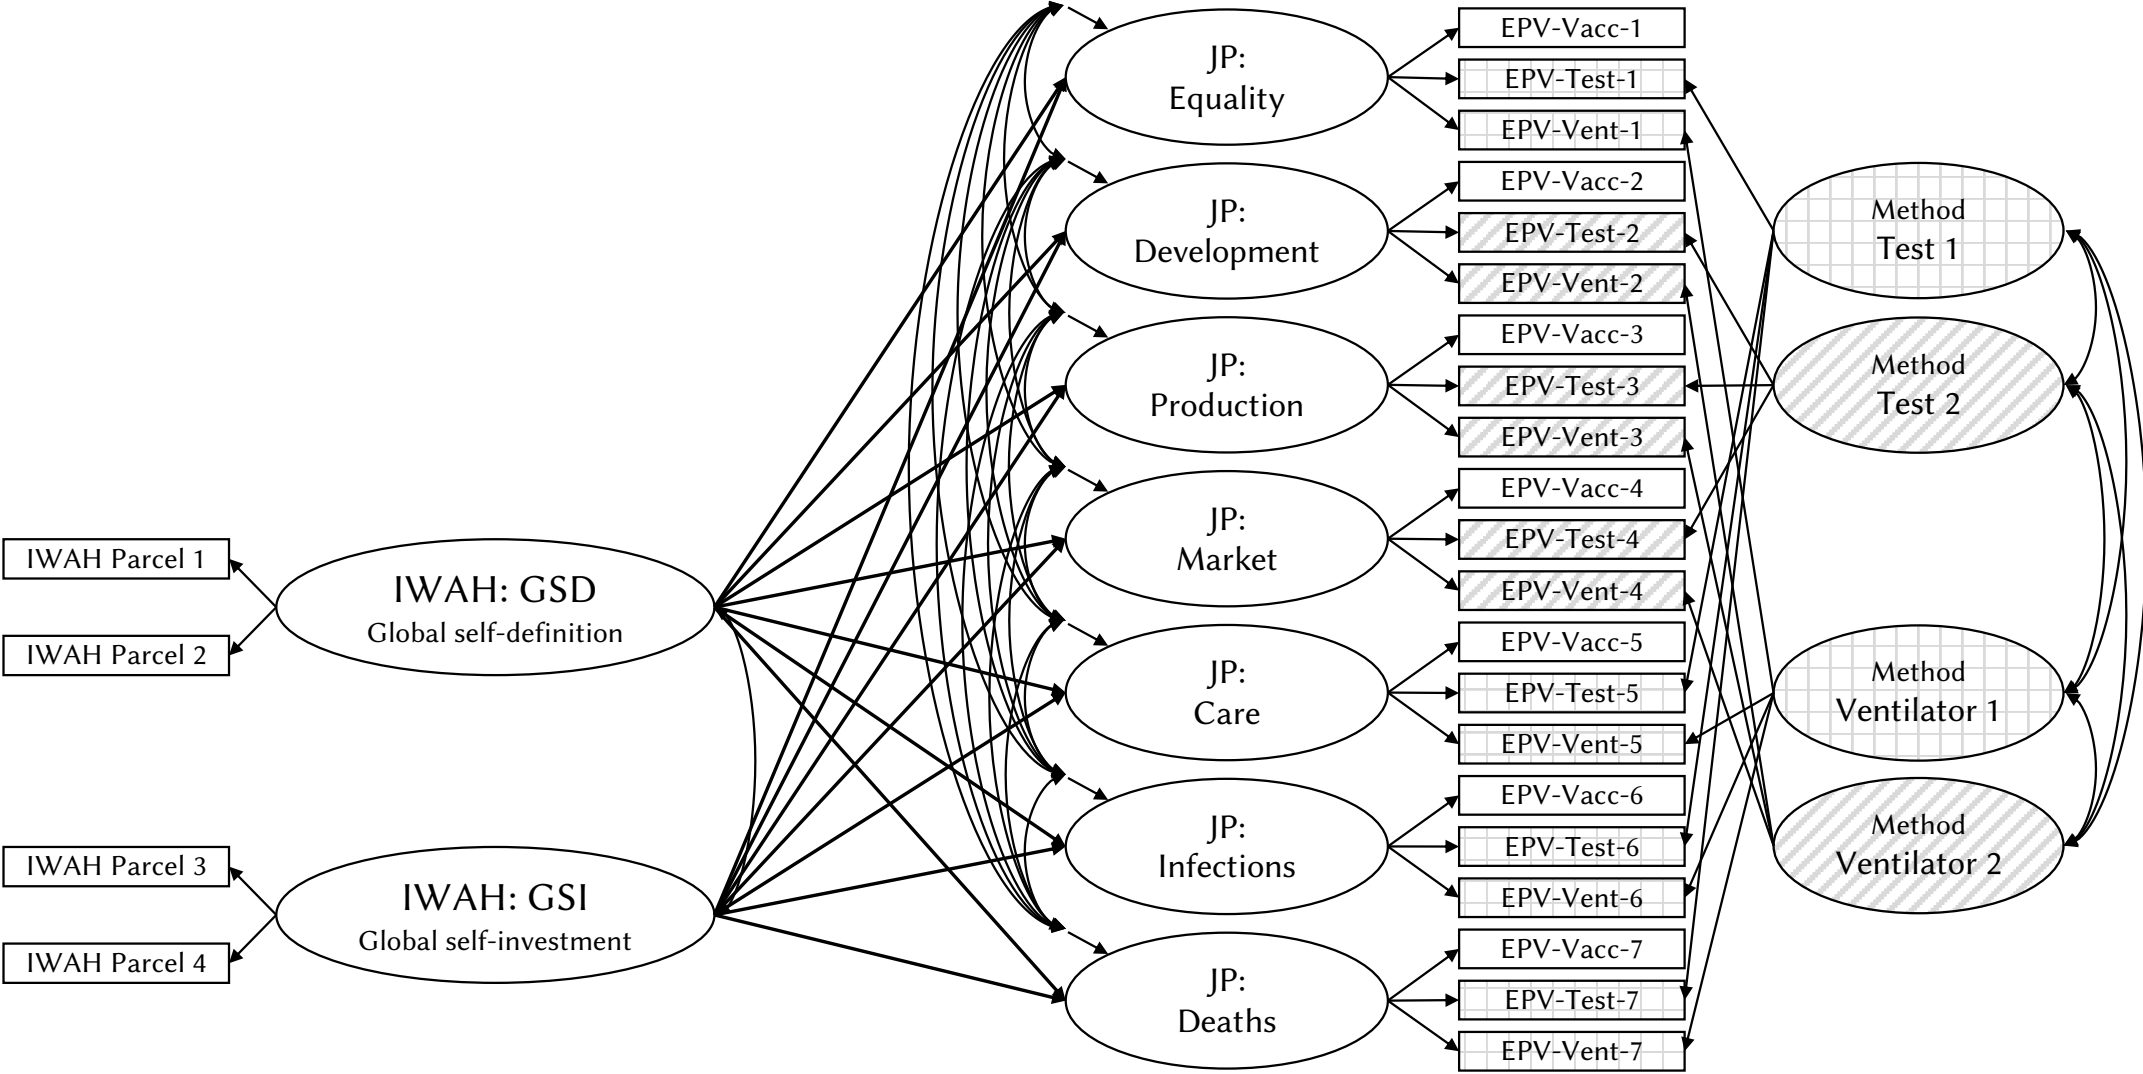

Justice beliefs (pandemics, global): Global Resource Distribution Principles Scale (GRDP)

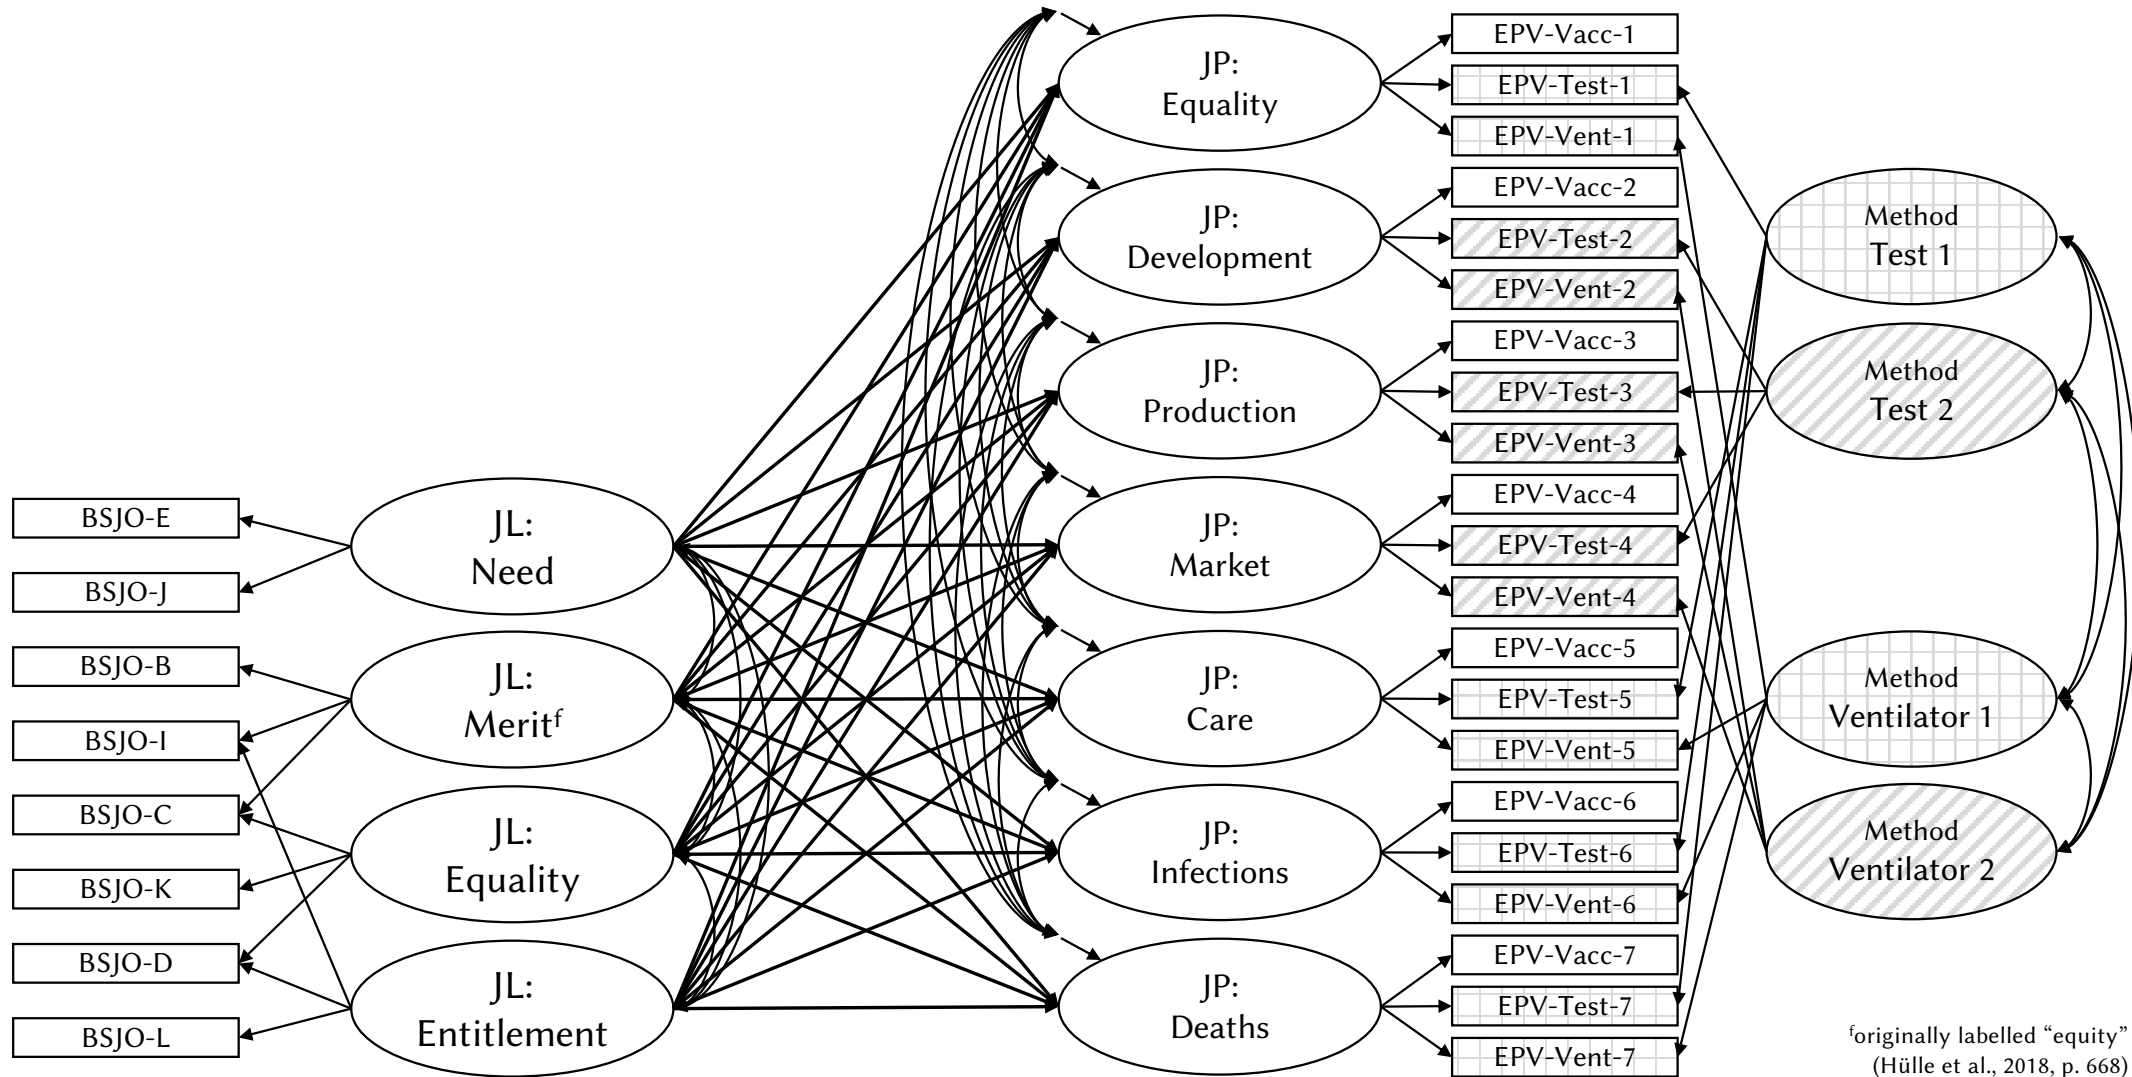

Structural Models

(McFarland et al., 2012; Reese et al., 2015; Trutzenberg et al, 2023, adapted from Fischer et al., 2017)

Model 1: Justice beliefs (pandemics, global) ~ Global identification (IWAH)

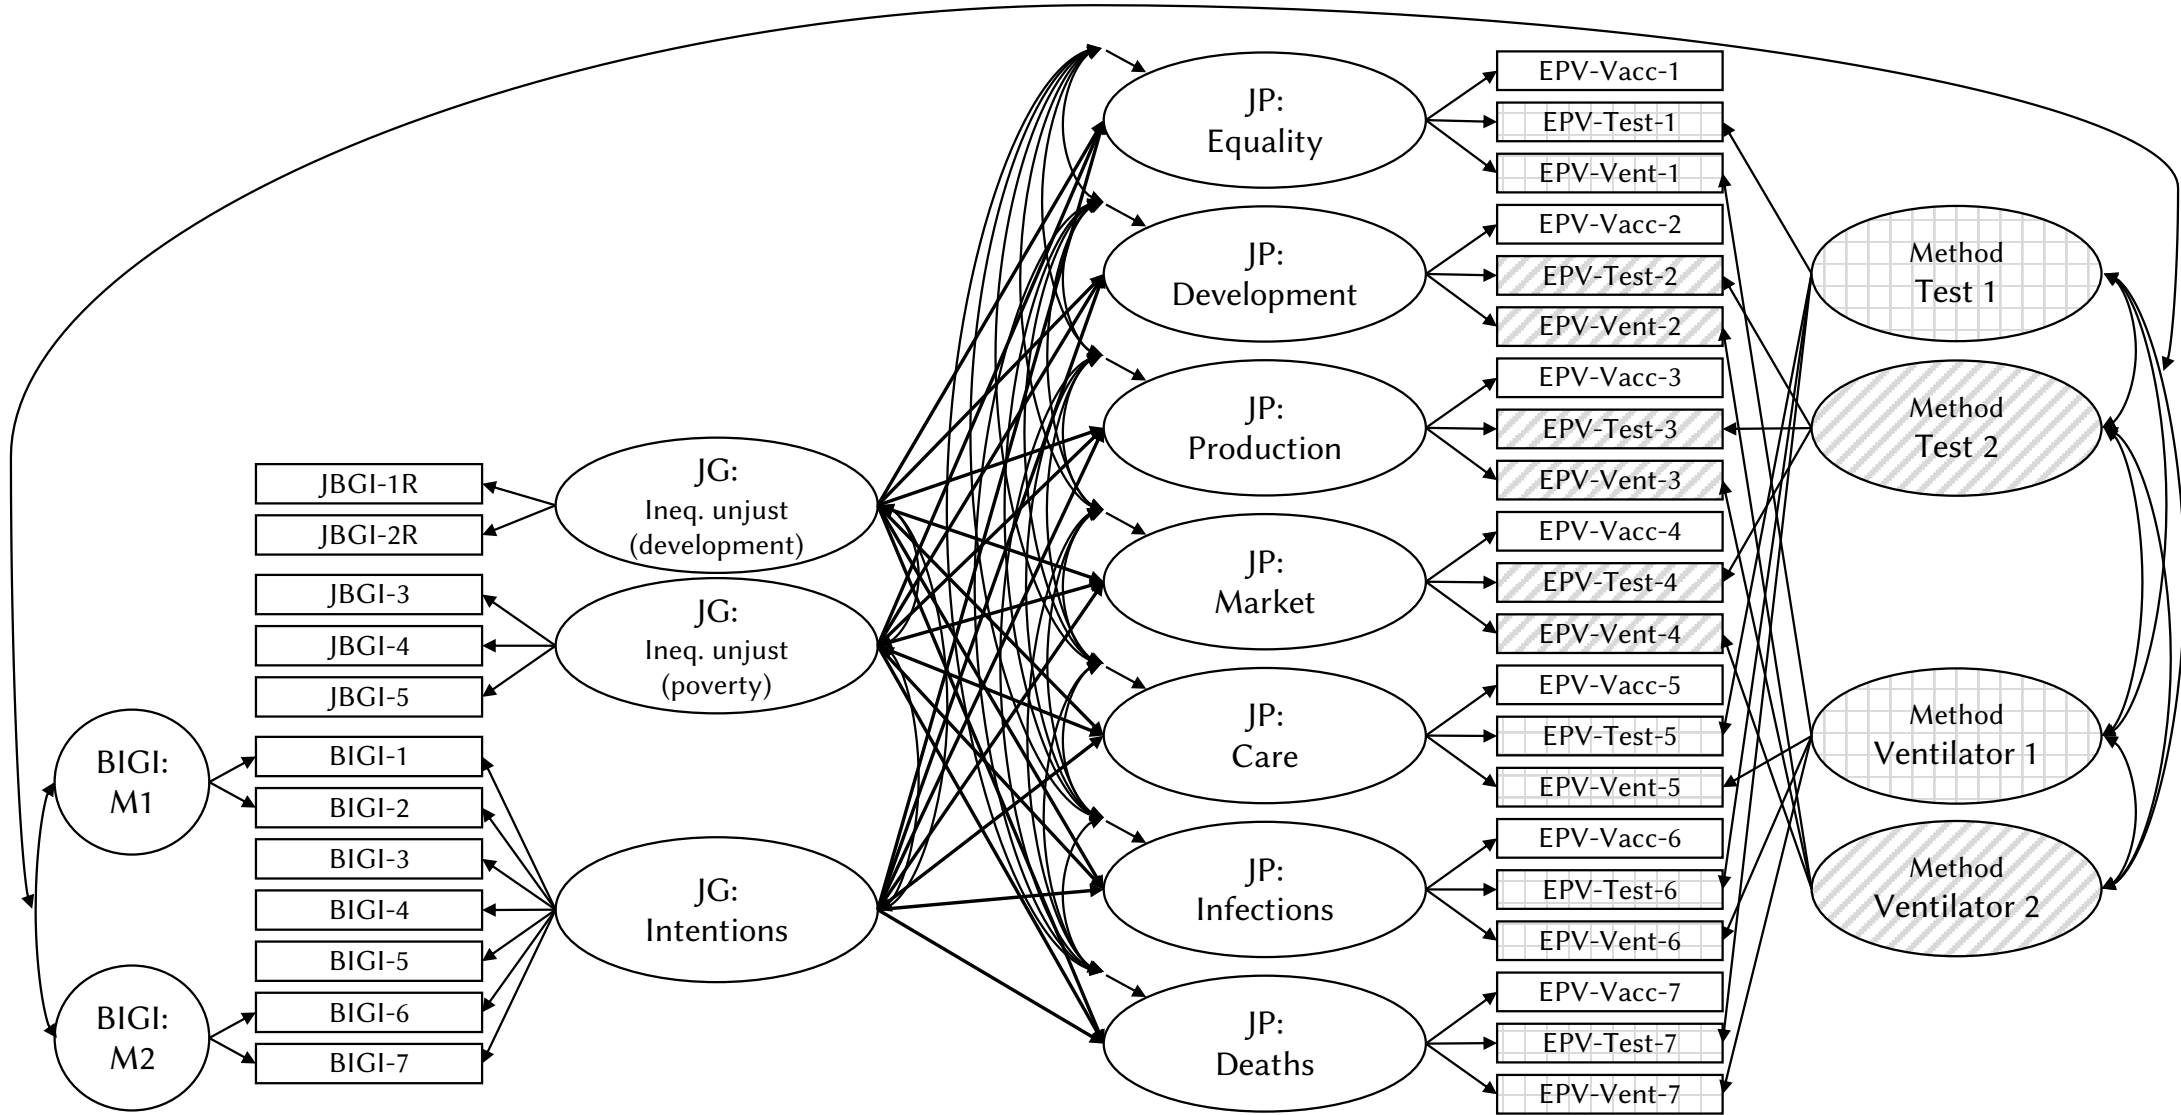

Model 2: Justice beliefs (pandemics, global) ~ Justice beliefs (“normal” times, local)

(Reese et al., 2012, 2014; Trutzenberg et al, 2023, adapted from Fischer et al., 2017)

Model 3: Justice beliefs (pandemics, global) ~ Justice beliefs (“normal” times, global)
